

Football Participation Report:

Aylesbury Vale

Season 10/11

INTRODUCTION

Football has the highest participation of any team sport in the country - there are over 129,000 affiliated football teams in England, (10/11). The National Game Strategy is The FA's plan for grassroots football between 2008 and 2012 and within this, there is an ambition to grow the game by a further 20,500 teams by 2012.

Over the past 8 years, The FA has invested in significant improvements to the affiliation process which has led to the development of the County Administration System (CAS). CAS allows us to chart participation within each local authority area and this report reflects the latest participation data in your particular area. These reports are freely available and it is hoped that they will be used by local authorities, developers, clubs, leagues and other interested parties to advise current and proposed activities and investments around the game at the local level.

The FA will welcome support and advice from local partners who are similarly interested in sustaining and developing the game. Since the production of the Season 09/10 Local Area Data Reports, significant effort has been put into improving data from the County Administration System (CAS). **In some instances, this has resulted in changes to the 10/11 totals compared to how they appeared in the last version of the report.**

Whilst the data provided is robust it is not claimed to be 100% accurate. There are a number of reasons why some errors will exist and it is critical that errors are reported back to The FA and/or CFAs so we can continually improve the quality of the information available. Please report any errors or omissions to either your local County FA or Data@TheFA.com.

Each year, the County Football Associations and The Football Association will work hard to improve methods for capturing data. As a result, in some circumstances, there may appear to be shifts in participation which are directly due to refined/improved data entry rather than actual growth or decline. Please ensure that in assessing trends, you take advice from your respective County FA.

Changes in this version:

1. Population Figures updated to Mid 2009 estimates.
2. Active people data updated and taken from APS4.
3. Introduction of Youth - All Formats Category which includes:
 - a) U11 to U18 football of Male, Female and Mixed genders (mixed is included into male category for the purposes of this report).
 - b) 3v3, 4v4, 5v5, 6v6, 7v7, 9v9 and 11v11 team categories.
4. Further refinement of specific playing locations of teams (this will have resulted in some teams being reallocated into new Local Authority areas).
5. Improved validation of small sided teams (including affiliated and currently non affiliated teams).

This year a User Guide has also been produced in order to provide additional support in analysing the data, and it is recommended that this document is referred to alongside this report. The guide can be found at: https://www.fadml.com/C13/Football_Development/default.aspx and will be available from 1st March 2011.

Conversion Rates

The following table and graphs show football conversion rates in the authority compared to Regional and National rates. These are calculated by comparing the number of persons playing football to the relevant population age group.

We estimate the number of individuals playing football by multiplying the number of teams by the average number of players involved in the different forms of football. We assume the following:

- 18 players are involved in an 11-a-side squad
- 10 players in a Mini-Soccer team squad
- 12 players in a 9 v 9 small-sided team squad
- 9 players in a 7 v 7 small-sided team squad
- 8 players in 6 v 6 and 5 v 5 small-sided team squads
- 6 players in a 4 v 4 small-sided team squad

These numbers are then expressed as a proportion of the relevant population. This creates a percentage of the population at each age group involved in playing football, called a 'conversion rate'. We can then compare these conversion rates to Regional and National averages.

Ages 5 to 44, male and female, of the local area population have been used to calculate the conversion rates on this page.

Local Authority Comparison of Conversion Rates

A comparison of conversion rates of Local Authorities can be made between those similar in nature by utilising the National Statistics 2009 Area Classification of Local Authorities (provided by the Office for National Statistics). The classification groups Local Authorities based on population characteristics.

Table 2 below shows the conversion rates for Aylesbury Vale compared to those most similar to it, that is, members of the same subgroup:

Basingstoke and Deane, Bracknell Forest, Brentwood, Chelmsford, Chiltern, Dacorum, East Hampshire, East Hertfordshire, Elmbridge, Epping Forest, Epsom and Ewell, Guildford, Hart, Hertsmere, Horsham, Kennet, Mid Sussex, Mole Valley, North Hertfordshire, North Wiltshire, Reigate and Banstead, Rochford, Runnymede, Sevenoaks, South Bucks, South Cambridgeshire, South Oxfordshire, Spelthorne, St. Albans, Surrey Heath, Tandridge, Test Valley, Three Rivers, Tonbridge and Malling, Tunbridge Wells, Uttlesford, Vale of White Horse, Waverley, West Berkshire, Winchester, Windsor and Maidenhead, Woking, Wokingham, Wycombe

Table 2: Comparison of Local Authorities in the same subgroup as Aylesbury Vale.

Football Type		Conversion Target ¹	Aylesbury Vale Conversion Rate	Variance	Growth Potential ²
Adult 11-a-side	Male	7.3	6.0	-1.3	25
	Female	0.3	0.1	-0.3	6
Youth ² (all formats)	Male	28.3	25.2	-3.2	157
	Female	3.0	1.8	-1.2	16
Mini-Soccer	Mixed	11.9	9.8	-2.0	19
Adult Small Sided	Male	2.1	0.5	-1.5	64

¹ The target is the value of the upper quartile (75th Percentile) of conversion rates of all local authorities in the same subgroup. The conversion target is calculated for each type of football.

² Growth Potential represents the number of teams for each football type that the local authority would need to develop to reach the conversion target value. For Youth (all formats) the growth potential has been calculated on an average number of players across all formats.

Local Authorities are encouraged to discuss growth potential targets with their County Development Manager to determine a realistic programme of intervention, supported by The FA, capable of increasing participation over an agreed period.

Where the Local Authority has participation rates already above the targets consideration should be given as to how these rates can be sustained long term.

- 2) Percentage of the adult population participating in football for at least 30 minutes at least once a week.

The results for Aylesbury Vale are shown below (where blank this indicates that data is unavailable due to small sample size):

	APS 4 - Football
